

SecureWatch for Financial Services

RiskWatch

Financial companies, such as banks, credit unions, accountancies, consumer-finance companies and stock brokerages, are continuously faced with challenges like cyber risk and regulatory risk. Challenges include but are not limited to:

- Data breaches.
- Loss of critical information.
- Identity theft.
- Financial loss.
- FFIEC standards and principles.
- NCUA regulations.
- CFPB compliance.

SecureWatch is a fully automated risk and compliance assessment software that has the ability to manage and assess both cyber risk and compliance for regulatory risk. The platform streamlines the entire risk assessment process and requires no training to use.

SecureWatch

A Compliance and Cyber Risk Solution

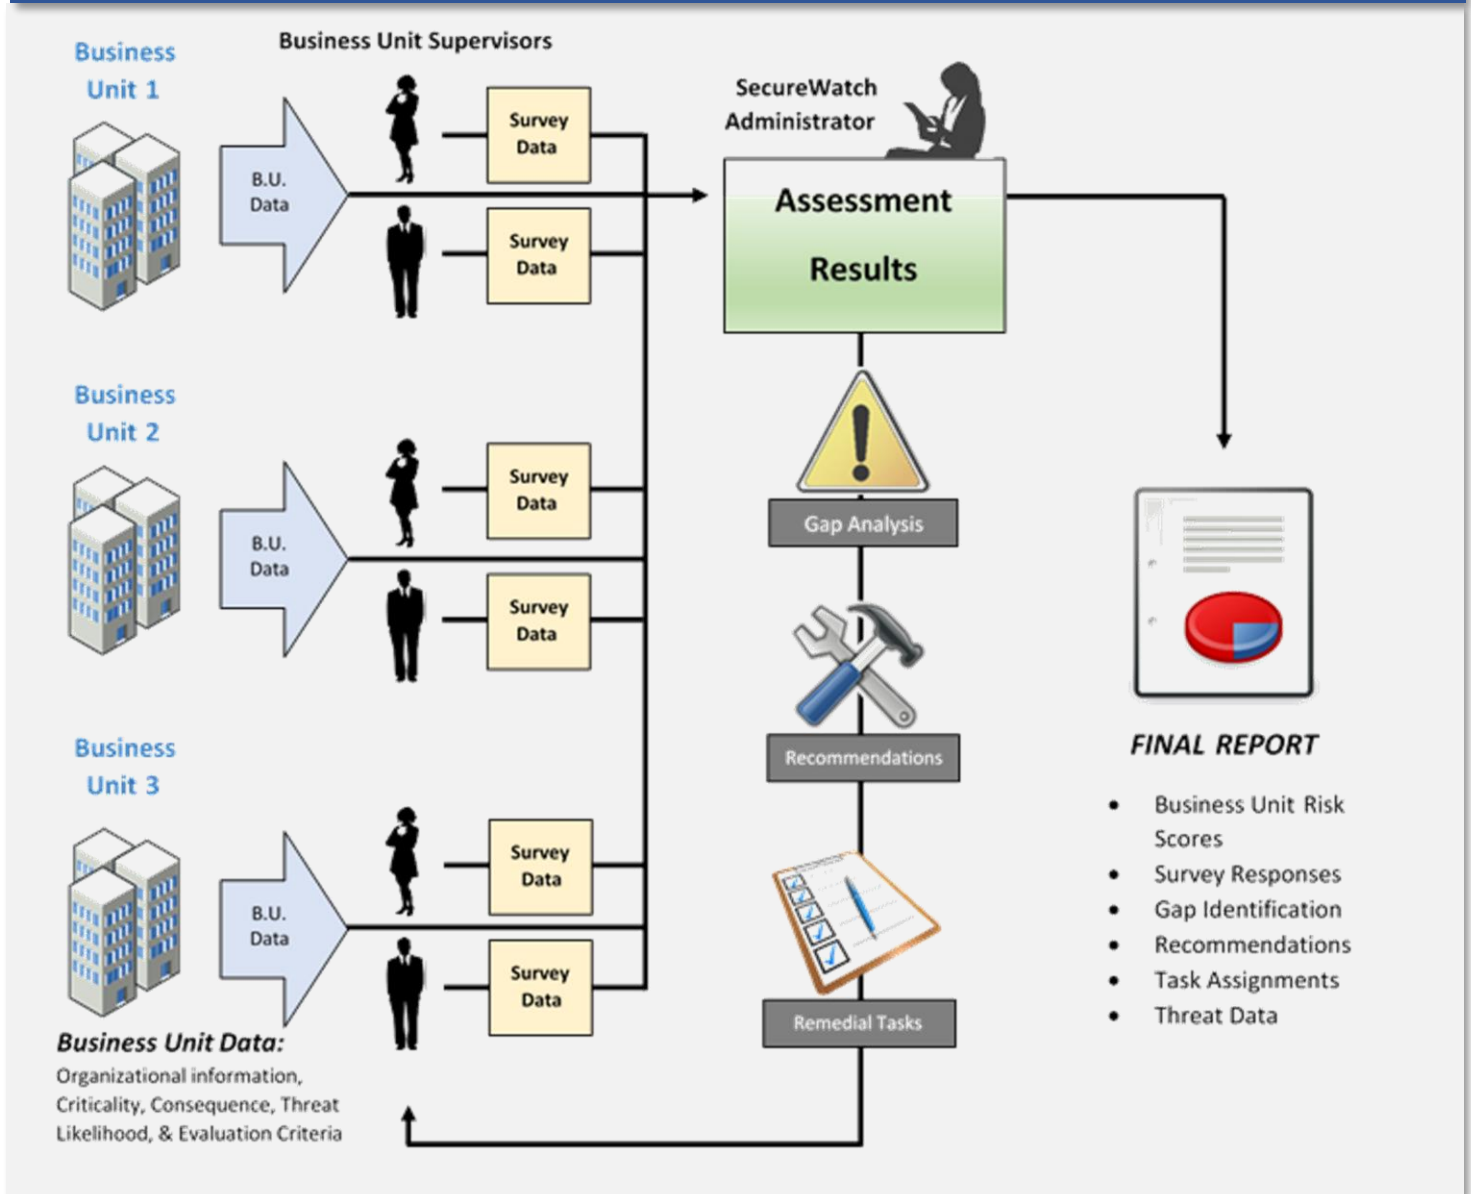

Through a proof of concept, financial companies can see these key benefits (and more) in **SecureWatch**:

- ✓ Leverages hundreds of customizable assessment questions based on FFIEC, NCAU, CFPB and other regulations and standards.
- ✓ Provides at-a-glance information regarding your enterprise cyber security, with drill-down functionality for robust reporting.
- ✓ Full audit-assessment reports are created to demonstrate proof of compliance.
- ✓ Manages all risk and compliance across your business in a single assessment, saving time and work.
- ✓ Reduces time needed to reconcile information with single-button access, detailed reporting and the ability to upload and archive auditable evidence.

The Process:

The Workflow:

RiskWatch offers a **free trial** and a consulting service to assist in performing a **proof of concept** using SecureWatch or any of its other platforms.
