

The oil and gas industry is responsible for supplying a number of products, but it is most well-known for supplying gasoline. Though it can be prosperous, drilling for oil and gas comes with a heap of risks.

### Risks in the oil and gas industry:

- Not complying with laws and regulations.
- Geological risks such as environmental factors.
- Threats of terrorism.
- Operational costs and profits.
- Supply and demand.

RiskWatch offers **Secure**Watch, a fully automated risk and compliance assessment solution that can manage and assess all areas of risk to oil and gas companies.

# Secure Watch

A risk assessment solution for oil and gas

Through a proof of concept, oil and gas companies can see these **key benefits** (and more) in **Secure** Watch:

- ✓ Streamlines the assessment process across the enterprise and with its powerful data gathering and analysis capabilities, easily identifies and picks high risk areas for detailed analysis.
- ✓ Semi-quantitative, ISO 31000 Methodology and NIST 800-30 Analysis capability guides on-site assessors to identify threats, vulnerabilities and security gaps to develop specific recommendations.
- ✓ Can automatically provide recommendations for security gaps or findings with its remediation module. Recommendations can be assigned to individuals as tasks or given to upper management for review in a custom auto-generated report.
- ✓ Data gathered can be repurposed in workflows.

### Secure Watch Process:

#### **Additional Benefits:**

- ✓ Recommendations can be automatically offered to mitigate gaps in compliance and for any identified vulnerabilities.
- Reports can be generated automatically to track and provide proof of compliance.
- Designed to work with all regulations and standards in all industries.
- ✓ Compliance analysis that determines risk score and identifies areas of high risk for further investigation.
- ✓ Real-time risk profiles and scores that updates as changes occur.

RiskWatch offers an instant free trial and a consulting service to assist in performing a proof of concept using SecureWatch or any of its other platforms
